语言
ORA-12432语言Oracle语言
The issue happens because the OLS metadata is incomplete as a result of
a shutdown abort executed while the script catnools.sql (or catols.sql) was
running.

```

```

语言
Oracle语言
--To solve this situation the LBAC option has to be disabled:
Step 1
cd $ORACLE_HOME/rdbms/lib
make -f ins_rdbms.mk lbac_off ioracle

-- Author : Robinson Cheng
-- Blog : http://www.linuxidc.com
-- DB Forum : http://www.linuxidc.com

```

```

Step 2
$ sqlplus "/ as sysdba"

SQL> startup migrate

SQL> @?/rdbms/admin/catnools.sql

SQL> shutdown immediate

SQL> startup

```
