Symptom (public)

Linux 启动时出现以下错误信息:
*** An error occurred during the file system check.

Problem (public)

Solution (public)

```
1 root#
2 root# fsck.ext4 -y /dev/sda3
eg.
3 root# fsck.ext4 -y /dev/sda3
3 root# reboot
```

fsck 清除文件系统错误。如果文件系统损坏，fsck 将尝试修复它。如果修复失败，fsck 将提示您是否要清除文件系统。清除文件系统将删除所有文件，因此请谨慎操作。

```
1 root# clear with error
2 root# umount /fstab 0 1
```
