Keywords

vmdk

Symptom (public)

```
linux FFO vmdk + workstation
"Mount: could not find filesystem '/dev/root'"
....
"Kernel panic....."
```

Problem (public)

```
1. initramfs scsi
2. i2node ModCfg.sh vmdk fstab grub.conf el5 el6 red
hat el6 centos 6.5
```

Solution (public)

```
el5
redhat 6.N centos 6.5
el5:
mkinitrd --with=scsi_transport_spi --with=mptspi --preload=scsi_transport_spi
--preload=mptspi /initrd-`uname -r`.img `uname -r`
cp -rf /initrd-`uname -r`.img /boot/
el6
mkinitrd --with=scsi_transport_spi --with=mptspi --preload=scsi_transport_spi
--preload=mptspi /initramfs-`uname -r`.img `uname -r`
cp -rf /initramfs-`uname -r`.img /boot/
el7
hotfix/7.1.72 release/7.1.72
ModCfg.sh
1.
2. chmod 755 ModCfg.sh
3. cp ModCfg.sh /usr/local/sdata/scripts/
```
